## **PREFACE**

This report offers a profile of the supply and distribution of physicians licensed in New York based on the latest data collected from the Center for Health Workforce Studies' ongoing New York State Physician Licensure Re-registration Survey. With presentations of physician workforce data at several aggregate levels, including state, region, county, and specialty, the report is intended to provide useful information for policy makers, educators, and other interested parties across the state.

This report was prepared by the Center for Health Workforce Studies, School of Public Health, University at Albany, State University of New York by David P. Armstrong and Gaetano J. Forte. This report and data collection effort was funded by the New York State Department of Health. The Center is dedicated to the collection, analysis, and distribution of health workforce data to assist health, professional and educational organizations; policy makers; and the public understand issues related to the supply, demand, distribution, and use of health workers. The views expressed in this report are those of the Center for Health Workforce Studies and do not necessarily represent positions or policies of the School of Public Health, University at Albany, State University of New York, the New York State Education Department, or the New York State Department of Health.

*December 2010*

## ACKNOWLEDGMENT

The authors wish to acknowledge the New York State Education Department for its assistance with the data collection process that supports this work. The authors also wish to acknowledge the editing of Lyrissa Smith. Funding for this report and related data collection efforts was provided by the New York State Department of Health.

## EXECUTIVE SUMMARY

This report summarizes the responses to the New York State Physician Licensure Re-registration Survey, as adjusted to official counts of licensed physicians in 2008 and 2009. The counts of physicians and the profiles of their demographic characteristics are the latest available for the state of New York.

In addition to presenting basic data for the state as a whole, the report describes five series of statistical profiles: one for the state, one for each CHWS New York health workforce region, one for each county, one for each medical specialty group, and one for each individual medical specialty.

Several of the most important observations about these data are summarized below:

- ❖ Of the 84,768 licensed physicians in New York, 78% (65,936) were active patient care physicians practicing in New York. Of these, 72% were located in downstate New York<sup>1</sup> and 91% were in urban counties.<sup>2</sup>
- ❖ The ratio of full-time equivalent (FTE)<sup>3</sup> physicians to the population was highest in the Long Island region, with 353 active patient care FTE physicians per 100,000 population. The ratio was lowest in the Mohawk Valley, with 175 FTE physicians per 100,000 population.
- ❖ Between 2005 and 2009, all regions experienced growth in the number of active patient care FTE physicians per 100,000 population. The North Country region experienced the most growth (12%) and the Mohawk Valley region experienced the least amount of growth (4%) in primary care FTEs.
- ❖ More than 20,000 physicians (31% of the total) reported one of the primary care specialties (family medicine, general internal medicine, and general pediatrics) as their principal specialty.
- ❖ Between 2005 and 2009, primary care FTE physicians per 100,000 population grew in all regions of the state. The Finger Lakes region experienced the most growth in primary care FTEs (17%) and the Mohawk Valley and New York City regions experienced the least growth (4%).
- ❖ The number of non-primary care FTE physicians per 100,000 population grew in all regions of the state. The growth of the non-primary care FTE physician supply was highest in the North Country and Southern Tier regions (12%) and lowest in the Mohawk Valley region (3%).
- ❖ The most common principal specialty reported among active patient care physicians was general internal medicine (10,413 or 16% of the total). The next most common principal specialties were psychiatry (9%), family medicine (7%), and general pediatrics (7%).

---

<sup>1</sup> Downstate New York includes the following counties: Bronx, Kings, Nassau, New York, Queens, Richmond, Suffolk, and Westchester.

<sup>2</sup> The urban/rural distinction was based on Ebert's typology (see Eberts R. *Socioeconomic Trends in New York State: 1950-1990*. Albany, NY: New York State Legislative Commission on Rural Resources, September 1994).

<sup>3</sup> Due to changing physician practice patterns FTE (full-time equivalent) physicians are the most appropriate metric for describing physicians practicing in New York.

- ❖ The fastest growing specialty group between 2005 and 2009 was facility-based specialties (anesthesiology, pathology, and radiology). The ratio of FTEs per 100,000 population grew by 11% for the specialty group over the time period. In contrast, the average rate of growth for all specialties was 7%. General surgery was the only specialty to not grow over the time period (0%).
- ❖ Eighty percent (80%) of physicians indicated they were certified by the nationally recognized American Board of Medical Specialties in their principal specialty. This figure varied significantly across specialties, from 61% in child and adolescent psychiatry to 89% in dermatology and otolaryngology.
- ❖ Group practice was the largest principal practice setting in 2009, reported by 34% of responding physicians. Hospital practice (30%) and solo practice (27%) were the next most frequently reported practice settings.
- ❖ New York physicians were predominantly male (68%) in 2009. However, women physicians were younger than men, reflecting the growing number of women entering the profession. The average age of female physicians was 48 versus 54 for male physicians.
- ❖ Seventy percent (70%) of physicians were non-Hispanic Whites. Underrepresented minorities (URMs) (Blacks/African Americans, Hispanics/Latinos, and American Indians/Alaska Natives) made up 10% of the physician workforce in 2009, but approximately 35% of New York's population.
- ❖ Thirty-five percent (35%) of active patient care physicians reported they were international medical graduates (IMGs), that is, they attended medical school in a foreign country (other than Canada). There were significant variations in the percentage of IMGs by specialty. For example, 53% of pathologists reported being IMGs while only 9% of dermatologists reported being IMGs.

## **BACKGROUND**

Physicians are central to the delivery of health care to the citizens of New York. This report provides a variety of numerical measures of the size and nature of the physician workforce in the state. An effort has been made to design the tables and the figures in the report to reveal patterns that can help planners and policy makers develop programs to improve health care in the state.

### ***The New York Health Workforce Data System***

In 2009, over 84,000 physicians held licenses from the New York State Education Department to practice medicine in New York. All physicians are required to register with the State Education Department every two years. Included in the materials distributed to physicians to re-register their licenses is a questionnaire (Appendix A) that requests physicians to provide information on a number of personal, professional, and practice characteristics. The responses to these questionnaires during the years 2008 and 2009 were the basis for the tabulations presented in this report. Where data were missing, attempts were made to substitute data from previous iterations of the survey. After adding data from the previous years, the survey had an estimated response rate of 75% (63,335 out of 84,767). These data are one component of the New York Health Workforce Data System administered by the Center for Health Workforce Studies. Other components of the data system include similar surveys of dentists, dental hygienists, and registered nurses licensed to practice in New York. Three new surveys are also being prepared for certified nurse midwives, nurse practitioners, and physician assistants. Data related to the population and health status were obtained from the New York State Department of Health and the U.S. Census Bureau (see Appendix B).

Several files were created from the survey data, each including slightly different numbers of respondents (see Appendix B). One of these files, File E, formed the basis of this report. File E, which includes all active patient care physicians who do not practice exclusively outside of New York, was used to examine the overall work profile of physicians active in medicine in the state. File E excludes medical residents since they are not required to be licensed and many of them are not eligible for licensure. File E also incorporates a weighting factor to account for non-respondents to the survey.

# RURAL COUNTIES

## ***REGIONAL PROFILES***

## REGIONAL PROFILES

This section presents a series of statistical profiles, one for each of the 10 CHWS New York Health Workforce Regions. In addition to basic counts and characteristics of physicians, the profiles present information on practice settings, board certification, location of residency training, and FTE counts by activity and specialty category in the workforce regions. The tabulations include only active patient care physicians and all of the figures exclude medical residents.

The map below shows the names of and the counties that comprise each workforce region.

**Figure 1. Map of CHWS New York Health Workforce Regions**

**Table 1. CHWS New York Health Workforce Regions**

<u>Region</u>	<u>Counties Included</u>
Capital District	Albany, Columbia, Greene, Rensselaer, Saratoga, Schenectady, Warren, and Washington
Central New York	Cayuga, Cortland, Onondaga, and Oswego
Finger Lakes	Genesee, Livingston, Monroe, Ontario, Orleans, Seneca, Wayne, Wyoming, and Yates
Hudson Valley	Dutchess, Orange, Putnam, Rockland, Sullivan, Ulster, and Westchester
Long Island	Nassau and Suffolk
Mohawk Valley	Fulton, Herkimer, Madison, Montgomery, Oneida, and Schoharie
New York City	Bronx, Kings, New York, Queens, and Richmond
North Country	Clinton, Essex, Franklin, Hamilton, Jefferson, Lewis, and St. Lawrence
Southern Tier	Broome, Chemung, Chenango, Delaware, Otsego, Schuyler, Steuben, Tioga, and Tompkins
Western New York	Allegany, Cattaraugus, Chautauqua, Erie, and Niagara

## ***MEDICAL SPECIALTY GROUP PROFILES***

## MEDICAL SPECIALTY GROUP PROFILES

This section presents a series of statistical profiles, one for each medical specialty group identified below (see Table 2). Each profile displays basic data on the number of physicians in and demographic composition of the specialty groups, as well as tabulations describing practice patterns. The tabulations are estimates for active patient care physicians. Physicians who reported no patient care hours were excluded from the tabulations, as were medical residents.

**Table 2. Medical Specialty Groups**

<u>Medical Specialty Group</u>	<u>Specialties Included</u>
Primary Care	Family Medicine, General Internal Medicine, and General Pediatrics
Obstetrics/Gynecology	Obstetrics and Gynecology and Gynecology
IM Specialties	Cardiovascular Disease, Critical Care, Endocrinology and Metabolism, Gastroenterology, Geriatrics, Infectious Disease, Nephrology, Pulmonary Disease, Rheumatology, Medical Oncology, Other IM Specialties
General Surgery	General Surgery
Surgical Specialties	Ophthalmology, Otolaryngology, Neurological Surgery, Orthopedic Surgery, Plastic Surgery, Thoracic Surgery, Urology, and Other Surgical Specialties
Facility Based	Anesthesiology, Pathology, and Radiology
Psychiatry	Adult Psychiatry and Child and Adolescent Psychiatry
Other	Allergy and Immunology, Dermatology, Emergency Medicine, Neurology, Occupational Medicine, Pediatric Subspecialty, Physical Medicine and Rehabilitation, Preventive Medicine, and Other

**In the next 12 months, do you plan to: (Please mark all that apply.)**

- Retire from patient care?
- Significantly reduce patient care hours?
- Move your practice to another location in New York?
- Move your practice out of New York?

**Mark the statement that best describes your patient care practice status.**

- I cannot accept any additional patients; my practice is full.
- I can accept some additional patients; my practice is nearly full.
- I can accept many additional patients; my practice is far from full.

**At your principal practice location, do you use electronic health records for your patients?**

- Yes
- No
- I don't know

**Do you use the Internet/email for any of the following: (Please mark all that apply.)**

- To obtain lab results, x-rays, or hospital records?
- To communicate with other physicians/providers?
- To communicate with/answer questions from your patients?
- To use clinical decision support tools?
- To obtain Continuing Medical Education credits?
- To transmit prescriptions to pharmacies?

**RACE/ETHNICITY (Mark all that apply.)**

**Physician Survey  
2009-2011**

This questionnaire is a supplemental part of your registration application. Please complete and return it with the registration form and fee in the envelope provided. If you complete the survey online, you do not have to complete this form.

Your responses will be maintained in a strictly confidential manner by the Center for Health Workforce Studies (chws.albany.edu) at the University at Albany, SUNY. The responses will be analyzed and presented only in aggregate form to document changes in the physician workforce in New York.

Item 2 asks for your NYS license number. This can be found on the enclosed registration application. Thank you for taking the time to complete this survey.

**INSTRUCTIONS**

- Make dark marks that completely fill the circle.
- Erase cleanly any marks you wish to change.
- Make no stray marks on this form.

CORRECT: ● INCORRECT: ☒

**1 DATE ON WHICH YOU ARE COMPLETING SURVEY**

**Number of hospitals in New York at which you have admitting privileges:**

- None
- One
- Two
- Three or more

**Which statement best describes your malpractice liability insurance coverage?**

- I pay for my individual policy.
- My employer/practice pays for/ provides my insurance coverage.
- I do not carry malpractice liability insurance.
- Other

## ***APPENDIX B: DATA AND METHODS***

## APPENDIX B: DATA AND METHODS

### 1. File Descriptions

Five different data files were created from the survey response data. All of the tabulations in this report are of active patient care physicians (File E). Since File E was created by adjusting the other four files, each of the files is described below. State physician estimates for each of the files are presented in Figure 1.

<b>A</b>	<b>Baseline Survey Response File (All Licensed Physicians)</b>	<b>63,335</b>
	<i>Less Inactive and Retired Work Status (Q5) and less Blank Work Status with no Practice Location (Q10) and no Patient Care Hours (Q7)</i>	<b><u>-4,006</u></b>
<b>B</b>	<b>Licensed Physicians Active in Medicine</b>	<b>59,329</b>
	<i>Less Physicians with only out-of-state Practice Locations (Q10)</i>	<b><u>- 8,239</u></b>
<b>C</b>	<b>Active Licensed Physicians in New York</b>	<b>51,036</b>
	<i>Less licensed Residents (Q6)</i>	<b><u>- 1,033</u></b>
<b>D</b>	<b>Active Licensed Physicians in New York, less Residents</b>	<b>50,003</b>
	<i>Less no Patient Care Hours (Q7)</i>	<b><u>- 738</u></b>
<b>E</b>	<b>Active Licensed Patient Care Physicians in New York</b>	<b>49,265</b>
	<i>Adjust for non-response</i>	<b><u>x 1.3384*</u></b>
	<b>Weighted Active Licensed Patient Care Physicians in New York</b>	<b>65,936</b>

\*  $84,768/63,335 = 1.3384$

The weight was based on responses for the entire licensed physician population. In 2008 and 2009, there were approximately 84,768 physicians licensed in New York and the baseline response for the state was 63,335.

**Figure B-1. Estimates of Physician Counts in New York, 2009**

## 2. 2005 Active Patient Care Physicians in New York Estimates

The 2005 physician estimates used in the change in supply calculation were based on data from the 2004 and 2005 New York State Physician Licensure Re-registration Survey and were calculated analogously to the 2009 estimates. During 2004 and 2005 the survey had an estimated response rate of 85% (65,646 out of 77,471).

## 3. Full-time Equivalent Estimates

The Full-time Equivalent (FTE) estimates were calculated as follows:

$$\text{FTE} = \text{Patient Care Hours} / 40$$
, where Patient Care Hours (Q6) have been estimated by assigning a minimum and maximum value to each Patient Care Hours category (see below) and then making a random draw from a uniform distribution between these minimum and maximum points for each respondent.

<u>Hours/Week</u>	<u>Min.</u>	<u>Max.</u>
None	—	—
1 – 9	1	9
10 – 19	10	19
20 – 29	20	29
30 – 39	30	39
40 +	40	59

#### 4. Upstate and Downstate New York Definition

In this report, downstate New York is comprised of all counties in the New York City and Long Island regions and Westchester County. All other counties are considered upstate New York.

#### 5. Urban and Rural County Definition

Counties with populations of less than 200,000 are considered rural. This definition is part of “Eberts’ typology” and comes directly from state Public Health Law. For more information regarding this classification scheme, see: Eberts R. *Socioeconomic Trends in New York State: 1950-1990*. Albany, NY: New York State Legislative Commission on Rural Resources, September 1994.

Forty-three of the 62 counties in New York are considered rural by this definition:

Allegany	Hamilton	Schuyler
Cattaraugus	Herkimer	Seneca
Cayuga	Jefferson	St. Lawrence
Chautauqua	Lewis	Steuben
Chemung	Livingston	Sullivan
Chenango	Madison	Tioga
Clinton	Montgomery	Tompkins
Columbia	Ontario	Ulster
Cortland	Orleans	Warren
Delaware	Oswego	Washington
Essex	Otsego	Wayne
Franklin	Putman	Wyoming
Fulton	Rensselaer	Yates
Genesee	Schenectady	
Greene	Schoharie	

## 6. Principal Practice Setting Categories

<b>Solo</b>	Solo Practice (pre-2009) Private Office/Medical Arts Building and Practice Size of 1 Physician (2009)
<b>Group</b>	Physician Partnership (pre-2009) Group Practice-Owner/Operator (pre-2009) Group Practice-Employee/Staff (pre-2009) Private Office/Medical Arts Building and Practice Size of > 1 Physician (2009)
<b>Hospital</b>	Hospital-Inpatient (pre-2009) Hospital-Outpatient Department (pre-2009) Hospital-Satellite (pre-2009) Hospital-Emergency Room (pre-2009) Hospital (2009)
<b>Other</b>	Free-Standing Health Center or Clinic (D & TC) (pre-2009) Staff Model HMO (pre-2009) Nursing Home (pre-2009) Home Health (pre-2009) State or Local Health Department (pre-2009) Other Setting (pre-2009) Freestanding Health Center/Clinic/Urgent Care Center (2009) Nursing Home/Other Residential Facility (2009) State/Local Health Department (2009) Other (2009)

## 7. Important Notes

Due to the periodicity of the registration process in New York, the data reported here should not be viewed as a snapshot in time of the current physician workforce. Rather, they should be seen as a general picture of the physician workforce during the years 2008 and 2009. For convenience, however, the numbers and tabulations reported reference the year 2009. It also must be emphasized that the data presented in this report are estimates and are subject to a certain degree of error, especially in the case of rare events, small populations, and missing data. Finally, in accordance with the confidentiality agreement between the Center and survey respondents, cells with counts below five are indicated as "--" throughout the report.

The principal practice location zip code was used to place individuals within a county. However, in some instances, zip codes overlap county boundaries. As a result, care should be taken when interpreting the estimates.

## **8. Other Data Sources**

Both *Percent in Poverty* and *Median Income* in the selected population characteristics table were obtained from the U.S. Census Bureau, Small Area Income and Poverty Estimates (SAIPE). These data were retrieved on December 15, 2010 from <http://www.census.gov/hhes/www/saipe/index.html>.

*Unemployment Rate* in the selected population characteristics table was obtained from the U.S. Bureau of Labor Statistics. These data were retrieved on December 15, 2010 from <http://www.bls.gov/Lau/>.

The population, race and ethnicity, and age data in the selected population characteristics table were obtained from the New York State Department of Health, Information Systems and Health Statistics Group, Bureau of Biometrics and Health Statistics, Claritas (Small Area) Data. These data were retrieved on May 17, 2010 from the Bureau of Biometrics and Health Statistics intranet at <http://biometrics/pops/claritas.htm>.

The information in the health status indicators table was obtained from the New York State Department of Health, New York State County Health Indicator Profiles. These data were retrieved on December 15, 2010 from <http://www.health.state.ny.us/statistics/chip/index.htm>.

Population data used to estimate the 2005 physician to population ratios for the change in supply estimates were obtained from the New York State Department of Health, Information Systems and Health Statistics Group, Bureau of Biometrics and Health Statistics, Claritas (Small Area) Data. These data were retrieved on July 7, 2006 from the Bureau of Biometrics and Health Statistics intranet at <http://biometrics/pops/claritas.htm>.

## **APPENDIX C: COUNTY SUMMARY**
